

You want better information, fast. Borrowers want a better experience. It starts by digitizing verifications.

Our Verification of Assets (VoA) report provides bank validated insight into your borrower's current financial assets. It's simple. Through an online experience, your borrower identifies their chosen accounts and permissions access for a review of their balance data. We rapidly generate a thorough report with detailed asset information and send it back to you. Assets are now verified in minutes.

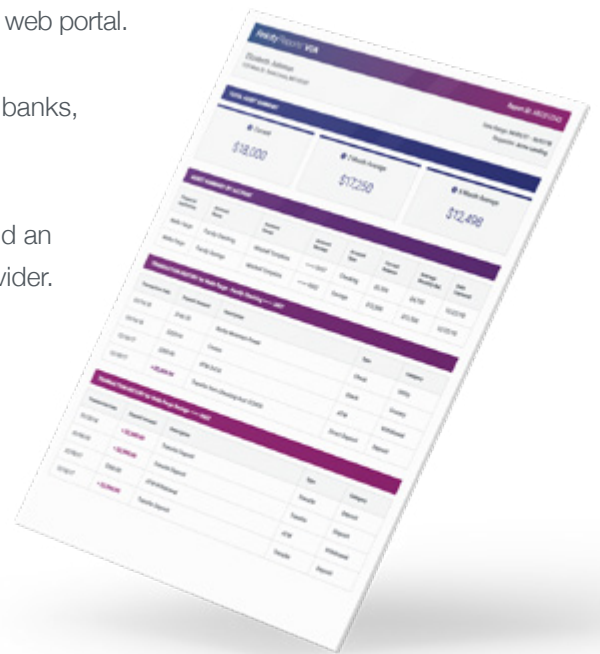

And to make it even easier, reports can be delivered through a wide range of our LOS and POS partners. Or if you'd like, via a direct connection as well as the Finicity Reports web portal.

Using digital verification saves time, provides data direct from the source - banks, and can be refreshed with no second request in most instances.

Finicity is an authorized report supplier for Fannie Mae Day 1 Certainty™ and an authorized Freddie Mac Asset and Income Modeler third-party service provider.

The data in the report includes:

- Financial institution name
- Account owner(s) & address
- Current, 2 & 6 Month Average Balances
- Account type
- Date range
- 180 days of validated transactions

Customer Experience

Finicity Connect makes it easy for consumers to identify their financial institutions and permission access through a simple popup. And it's completely customizable, so it can mirror your brand.
